TMS WELLNESS +

TrackMySchool
Wellness+

Say hello to our new and improved service that makes your students' personal health easier! Introducing our Educational Healthcare Software Solution which can be utilized by colleges/ schools and parents to monitor and manage students' health information like their immunization details, health records and everyday medication. Thus making communication, report generation and health-related documentation without any hassle.

TRACKMYSCHOOL®   homedr.in

Our key
Benefits

White labelled **App for College/ School**

- Get your very own School App (iOS and Android)
- Send Notifications directly (General Circulars, Notice Boards, etc) from app to all students/parents
- Strengthen parents' trust and visibility
- Online appointment schedule considering Covid-19 protocol

RFID Based **Temperature Monitoring**

- Alerts on temperature variations over a certain limit.
- View, monitor and track in real-time the location and temperature status of the student
- Remove the need for manual record-keeping by creating a unified, automated temperature logbook.

RFID Based **Attendance Management Solution**

- Provides wireless identification of students
- Contact-less, accurately & automatic attendance marking with RFID integrated ID solutions
- Real-time Mobile notification to Parents/ School authorities
- Each Entry and Exit into any facility will be notified and hence fully monitored and managed

Bulk Notification Solution

- Temperature variation and Health notification
- Absentee, Student entry and exit notification
- Report card reminders, fee reminders
- School closure alert, Online class & test schedule alerts
- School circulars (e- circular), notice boards, etc

Doctor-on-Demand

- A quick and convenient solution to connect with doctors
- School nurse can connect to HomeDr medical panel instantly
- Provides students with medical care from HomeDr doctor panel*
- Offers online guidance and consultations for several common health conditions like cold, flu, allergies, rashes, headaches and more*

Bot Doctor*

- AI consultation based on your personal medical history
- Offering solutions for simpler medical issues
- Lightning-fast clinical answers ensuring you are cared for during your time of need

Clinic Connect

- Connects college/ school clinic with HomeDr
- Keep a tab on students' vaccination status, temperature reading and any other medical history
- Keeps a track on the student's health records and well-being
- Analytical capabilities integrated to provide key insights to school
- Informative & interactive webinars presented and featured by experts from medical companies or organizations

*Some features are accessible only from 2022-23 academic year

Why
Choose Us

Our next generation Integrated School Management Solution along with Mobile Application used by over 150,000 users worldwide, now also focus on ensuring safety of the students whilst entering, leaving & at school. Offering an unconventional, well ordered, timely and digitised solution for medical care of students and staff, thus helping in alleviating the hassles school nurses go through with manual administrative processes in healthcare. Let's together keep safety in the forefront of school operations.

- Timely medication administration, reduced medical errors and safer care
- Quick access to student health records for coordinated care
- Safer and reliable prescribing
- Access legible and complete student health documentation from anywhere
- Eliminate the problem of illegible handwriting. Replace your paper logbook and make daily clinic-call more efficient
- Privacy and security of students' medical data
- Review health log entries and add addendum's if needed
- Save time on repetitive tasks with health log templates

- Fully customizable* with required fields and dynamic questions
- Send custom automatic reminder emails
- Pre-populate forms so families don't start from scratch every year
- Save time with multiple user access and data entry
- Create allergy reports with the click of a button
- Get alerts for medications you forgot to dispense
- Prioritise high-risk students
